Proportions and Cognition in Architecture and Urban Design

Measure, Relation, Analogy

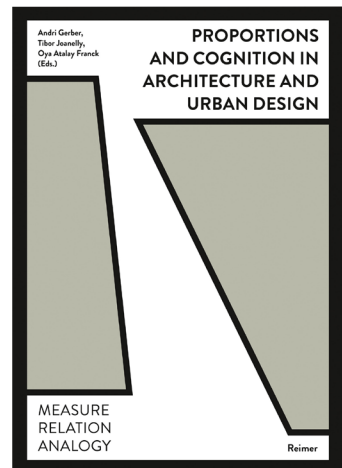

In *Proportions and Cognition in Architecture and Urban Design*, practicing architects, historians, and theoreticians discuss the proportional systems that juxtapose aesthetic judgements, forms of practice, and human and social bodies with the norms and ideals that have resulted from these relationships. They retrace the history of these proportional systems, the expectations with which they were associated, how they were introduced into design, and how contemporary practice builds upon this tradition—or allows new interpretations to unfold.

The editors

Andri Gerber is an architectural and planning historian and an urban metaphorologist. He has been a visiting professor and private lecturer at the ETHZ since August 2017. Tibor Joanelly is an architect and architectural publisher in Zurich. Since 2007, he has been a lecturer in architectural theory and architectural debate at the Zurich University of Applied Sciences (ZHAW). He has been the editor of *werk, bauen + wohnen* since 2009. Oya Atalay Franck leads the Department of Architecture, Design, and Civil Engineering at the Zurich University of Applied Sciences (ZHAW).
