The Morphology of Urban Landscapes

History, Analysis, Design

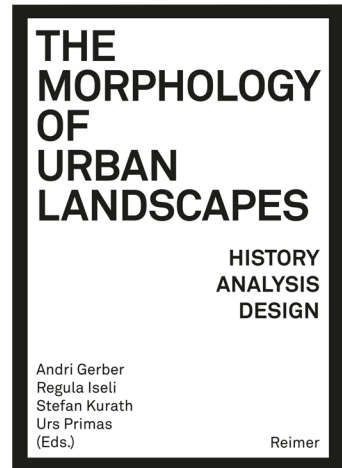

The investigation of the forms of our urban landscapes and of their sustainable future development are urgent challenges. However, there is hardly anything more complex and contradictory than urban settlement forms. It comes as no surprise, therefore, that the urban morphological approaches coexisting today as an interdisciplinary field of research differ considerably in their definitions, methodology and areas of application. To provide an overview, this book takes up different strands of urban morphology. 19 authors discuss influences as well as differences and present the latest findings from research and practice.

The editors

Andri Gerber is Professor at the Institute Urban Landscape, ZHAW Winterthur. Regula Iseli is Professor of Architecture and Urban Planning and Co-Head of the Institute Urban Landscape, ZHAW Winterthur. Stefan Kurath is Professor of Architecture and Design and Co-Director of the Institute Urban Landscape, ZHAW Winterthur. He also runs his own offices in Zurich and Graubünden. Urs Primas is lecturer for urban design at the Institute Urban Landscape, ZHAW Winterthur and co-owner of the architectural office Schneider Studer Primas in Zurich.
